

Week ending 13th September 2019

Literacy

This week in Year 4, children have been looking at what makes a good explanation text. They have looked at several examples and have created a toolkit which will help them with their writing later in the unit.

Maths

We have continued our work on place value. We have looked at how to separate a four digit number into thousands, hundreds, tens and ones. Children have also been looking at how numbers can be partitioned in different ways.

Science

We have started an exciting new topic on shadows. Children have had the opportunity to experiment with torches and really consider how shadows are made.
