

Week ending 2nd October 2020

Literacy

This week, we have started a new unit on explanation texts. The children have been looking at ordering a sequence of events along with mastering new writing techniques such as: fronted adverbials, subordinate clauses and nouns for precision. All of these writing techniques will help the children when they produce their own explanation texts next week.

Maths

In maths this week, we have started looking at properties of shape. The children have learnt all about acute and obtuse angles and are now able to identify, compare and order these angles.

Science

This week in Science, the children have planned a fair test and carried out an experiment to see if changing the distance between an opaque object and the light source changes the size of the shadow. The children then recorded their results in a table and created a bar graph to show their results clearly.
