

## Week beginning 22nd November 2021

### Maths

Our main focus this week was Addition and Subtraction. We began subtracting 4-digit numbers from 3 and 4-digit numbers without exchange ensuring that children remember to align the numbers correctly based on their place value. The children then moved onto column subtraction with exchange before ending the week with mixed addition and subtraction word problems.

### Literacy

In Literacy, we continued our learning on Myths. We began the week by working on using a variety of subordinating and coordinating conjunctions to create complex and compound sentences as well as recapping on the use of nouns for precision. We followed this up by answering retrieval questions based on the Theseus and the Minotaur myth to show our understanding of the story which we will be using to write the story from a different character's point of view. We ended the week by creating a story map of the story from Ariadne's point of view.
