

Week beginning 10/01/22

It's Anaya and Ayan here from Brampton Class. We are here to keep you updated on what is happening in Year 5.

In Numeracy we continued our learning multiplying four-digit numbers by two-digit numbers using the column method.

We used our learning to problem solve incorrect multiplications and explain the errors using mathematical vocabulary.

Spot the Mistakes

Can you spot and correct the errors in the calculation?

		2	5	3	4		
x				2	3		
<hr/>							
		1	7	5	1	9	2
		1	5	0	6	8	
<hr/>							
	1	2	1	6	1	6	0

Our topic for Science is Stopping and partially stopping energy – heat and electricity. We have been making different circuits using a cell, wire, bulb, switch, buzzer, motor circuits simple and drawing using standardised symbols.

We then investigated what would happen if we made a simple circuit and kept on adding more bulbs until the bulb stops working. Did you know we added 10 bulbs before the bulb stopped working? Then we repeated the investigation using motors and buzzers. It was very electrifying!

In Geography our topic is Asia. Did you know that Asia is the largest continent? This week we learnt about the six different biomes that can be found in Asia. Biomes are areas of our planet with similar climates, landscapes, animals and plants.

This week we were so lucky to have our 'Bikeability' course. Hamilton and Brampton Class had their turn this week. As everyone is at different stages of controlling a bike our instructor Oliver split the class into three groups and we all had two sessions each. We all enjoyed our bike riding experience and at the end of the course we all received a Bikeability Level 1 certificate.
