Year 1

This week the children had an amazing Design and Technology day.

They have had experience joining two pieces of fabric together using different methods like: sewing, gluing, stapling etc. They then designed their own finger puppets, made them and then evaluated their work.

It was a fun day and we hope they enjoyed it because we did!

In Literacy this week the children have changed the villain from the story of Rumpelstiltskin and they created their own character using amazing adjectives to describe it.

In Numeracy we have been learning about multiplication and division for groups of 2, 5 and 10.

In Science we looked at changes to animals in Spring. They have understood that when the weather warms up animals come out of hibernations and start to look for food.

In RE the children have been learning about the five pillars of Islam. They wrote sentences about what each pillar is.

Thank you,

Year one team.
