

April 25th 2022

Year One

We are pleased to see that the children look rested, and that attendance has improved. Please remember that the children need to bring their coats to school every day as it has been raining a lot. Please make sure that the children are wearing school shoes and that they have their P.E kits clearly labelled and at school.

Last week in literacy, the children learnt a poem by heart and wrote sentences describing each minibeast. The children were writing accurate sentences using adjectives and conjunctions. They were able to perform the poem in groups using actions and loud voices to the rest of the class.

In science, the children were learning about how to care for a plant. They sequenced pictures to show how to care for a plant and they wrote simple instructions for each picture.

Last week in Numeracy, the children were learning about measure. They learnt that length is how long or short something is and that weight is how heavy or light something is. They used non-standard units and started to understand cms as a standard unit of measure.

The topic in Design and technology is sculpture. The children will be learning what a sculpture is and they will also use clay to design and create their own sculptures. This will be an exciting topic and we shall be uploading pictures of the sculptures they make.

In geography the children used atlases to locate the continents of the world. They learn what a continent is. In the upcoming weeks they will be learning about oceans and the different countries of the United Kingdom.

Thank you,

The Year One Team.
